International Journal of Fracture

CONTENTS OF VOLUME 92 (1998)

Vol. 92, No. 1, 1998

Characterizing mode II delamination cracks in stitched composites	ROBERTA MASSABO, DANIEL R. MUMM and BRIAN N. COX	1–38
An assessment of the C^* and K_I parameters for predicting creep crack growth in a Ni-base superalloy (Waspaloy) at 700°C	L. XIA, A.A. BECKER and T.H. HYDE	39–53
Eigenspectra and orders of singularity at a crack tip for a power-law creeping medium	LU MENG and S.B. LEE	55–70
Crack extension resistance and fracture properties of quasi-brittle softening materials like concrete based on the complete process of fracture	SHILANG XU and HANS W. REINHARDT	71–99

Vol. 92, No. 2, 1998

Using the local approach to evaluate scaling effects in ductile fracture	JACQUES H. GIOVANOLA and STEVEN W. KIRKPATRICK	101–117
Fracture toughness behavior of weldments with mis-matched properties at elevated temperature	LAURENT CRETEGNY and ASHOK SAXENA	119–130
On mixed-mode fracture of PVC foam	P.M. NOURY, R.A. SHENOI and I. SINCLAIR	131–151
Crack growth and cleavage in mismatched welds: a micromechanics study using a cell model	P.M. MORAN and C.F. SHIH	153–174
Calibration of Weibull stress parameters using fracture toughness data	X. GAO, C. RUGGIERI and R.H. DODDS, JR.	175–200

Vol. 92, No. 3, 1998

The dual boundary contour method for two-dimensional crack problems	ZHOU SHENSIE, SUN SHUXUN and CAO ZHIYLIAN	201–212
Modified four-point bending specimen for determining the interface fracture energy for thin, brittle layers	INES HOFINGER, MATTHIAS OECHSNER, HANS-ACHIM BAHR and MICHAEL V. SWAIN	213–220
Numerical modeling of fracture coalescence in a model rock material	ANTONIO BOBET and HERBERT H. EINSTEIN	221–252

Inverse method of identification for three-dimensional subsurface cracks in a half-space	WILLIAM D. KEAT, MICHAEL C. LARSON and MELODY ARTHUR VERGES	253–270
Development of a process zone in rubber-modified epoxy polymers	J. DU, M.D. THOULESS and A.F. YEE	271–285
Effect of constraint on void growth near a blunt crack tip	CHENG YAN and YIU-WING MAI	287–304

Vol. 92, No. 4, 1998

Complex variable method for problems of a laminate composed of multiple isotropic layers	H.G. BEOM and Y.Y. EARMME	305–324
The mode III full-field solution in elastic materials with strain gradient effects	L. ZHANG, Y. HUANG, J.Y. CHEN and K.C. HWANG	325–348
Steady-state flow experiments to visualise the stress field and potential crack trajectories in 2D elastic-brittle cracked media in uniaxial compression	MICHEL KÜNTZ, PAUL LAVALLÉE and JEAN CLAUDE MARESCHAL	349–357
Probabilistic cell modelling of cleavage fracture	MÅNS ISACSSON, FRED NILSSON and JONAS FALESKOG	359–372
Microstructural modelling of creep crack growth from a blunted crack	P.R. ONCK and E. VAN DER GIESSEN	373–399
Author index		401
Volume contents		403–404

International Journal of Fracture

CONTENTS OF VOLUME 92 (1998)

Vol. 92, No. 1, 1998

Anisotropic material with arbitrarily oriented cracks and elliptical holes: effective elastic moduli	IGOR TSUKROV and MARK KACHANOV	L3–L8
On the relationship between microstructure of the cortical bone and its overall elastic properties	IGOR SEVOSTIANOV and MARK KACHANOV	L9–L14

Vol. 92, No. 2, 1998

On the stress intensity factor for the elliptic crack	B. NULLER, E. KARAPETIAN and M. KACHANOV	L17–L20
On calculation of SIFs for circular and moderately non-circular cracks	EDGAR KARAPETIAN and MARK KACHANOV	L21–L26

Vol. 92, No. 3, 1998

The fragmentation of standard concrete cylinders during the compressive testing	ANDREAS W. MOMBER	L29–L34
Analysis of an interface fracture specimen for adhesively bonded joints	DEEPANKAR DE and R. NARASIMHAN	L35–L40

Vol. 92, No. 4, 1998

The bending to stretching transition of a pressurized blister test	KAI-TAK WAN and SOON-CHONG LIM	L43–L47
On oblique cutting of cellular elastic materials	MICHAEL RYVKIN	L49–L54
Volume contents / Author index		L55–L56
